

Coding & Solution

Date	30 June 2026
Team ID	6a3a555ae5895b2c9759029d
Project Name	EduGenie - Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack

<https://github.com/Saajith-07/EduGenie-Google-Gemini-Powered-Learning-Assistant>

2. The solution should meet all functional requirements

3. Include all source files

Python 3.10, JavaScript, HTML, CSS

4. Attach or link to your solution

FastAPI, Uvicorn, Jinja2 template rendering engine

Solution Summary

Field	AI Q&A chat; leveled concept explanation (local T5 + Gemini fallback); MCQ quiz generation; text/notes summarization; personalized learning roadmap; JSON-file query/response logging; demo/mock mode; Dockerized deployment
Repository Link / URL	
Programming Language(s)	User authentication and role-based access; migration from JSON files to a relational database (PostgreSQL); usage analytics dashboard; consolidation of duplicate router/direct API endpoints
Framework(s) Used	
Key Features Implemented	1) pip install -r requirements.txt 2) Copy .env.example to .env and set GEMINI_API_KEY 3) uvicorn main:app --reload -> Open http://127.0.0.1:8000 4) Docker: docker build -t edugenie . && docker run -p 8000:8000 edugenie
Pending / Incomplete Features	
Setup / Run Instructions	

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	
2	Meaningful variable and function names are used	
3	Code includes comments / documentation where necessary	
4	Error handling is implemented for critical operations	
5	The application runs without critical errors	
6	Code is committed to a version control repository
