Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	Lands on the EduGenie home page; reads the FAQ / hero section.	Opens Chat, Explain, Quiz, Summary or Recommend page and submits a question / topic / note.	Returns repeatedly before exams; builds a learning roadmap and revisits quizzes.
Touchpoint <i>What part of the service do they interact with?</i>	Home page (index.html), About page.	Chat / Explain / Quiz / Summary / Recommend dashboards.	Recommend dashboard (roadmap), Quiz dashboard (score tracking).
Customer Thought <i>What is the customer thinking?</i>	"Can this actually help me study faster?"	"This explanation finally makes sense."	"I know exactly what to study next."
Customer Feeling <i>What is the customer feeling?</i>	Curious, slightly skeptical.	Engaged, relieved.	Confident, in control.

Process Ownership <i>Who is in the lead on this?</i>	Frontend / UX (index.html, static/js/main.js)	Backend AI modules (qna.py, explanation_module.py, quiz_module.py, summary_module.py)	learning_path.py + JSON data store (learning_paths.json)
Opportunities <i>How can we improve this stage?</i>	Add a guided first-use walkthrough on the home page.	Reduce Gemini JSON-parsing failures with stricter schema validation.	Add progress tracking / spaced-repetition reminders in a future release.
