Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	
	https://edugenie-google-gemini-powered-learning-n2zf.onrender.com/ Not applicable - no authentication is currently implemented (single seeded default user).	
1	Complete source code files	
2	README / Instructions for running the application	
3	requirements.txt / package.json / dependency file	
4	Database schema / seed files (if applicable)	
5	Environment configuration file (.env.example or similar)	
6	Deployed application URL (if hosted)	
7	APK / Executable binary (if applicable for mobile/desktop apps)	
8	Dockerfile / Containerization config (if applicable)	
9	Test files and test results	
10	Demo video or walkthrough (if required)	

<https://edugenie-google-gemini-powered-learning-n2zf.onrender.com/>

Not applicable - no authentication is currently implemented (single seeded default user).

Docker container hosting, Render Web Services.

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

[Paste or describe your folder structure here. Example:]

```

/project-root
/src    - Source code files
/tests  - Test files
/docs   - Documentation
/config - Configuration files
README.md - Setup and run instructions
requirements.txt - Python dependencies (or package.json for Node)

```

Step 3: Deploymer

Field	Not applicable - no authentication is currently implemented (single seeded default user).
Hosted / Deployer	Docker container hosting, Render Web Services.
Login / Credentials (Demo)	-
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	
Demo Video Link	

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

[List required software, versions, and system requirements]

Step 1: [e.g., Clone the repository: git clone <url>]

Step 2: [e.g., Install dependencies: pip install -r requirements.txt]

Step 3: [e.g., Configure environment: copy .env.example to .env]

Step 4: [e.g., Run database migrations: python manage.py migrate]

Step 5: [e.g., Start the application: python manage.py runserver]

Step 6: [e.g., Open browser at http://localhost:8000]
