

Coding & Solution

Date	15 March 2026 30 June 2026
Team ID	XXXXXX 6a3a555ae5895b2c9759029d
Project Name	XXXXXX EduGenie - Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

- Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
<https://github.com/SaaJith-07/EduGenie-Google-Gemini-Powered-Learning-Assistant>
- The solution should address the core problem statement and implement the key functional requirements.
 Python 3.10, JavaScript, HTML, CSS
- Include all source files, configuration files, and setup instructions needed to run the application.
 FastAPI, Uvicorn, Jinja2 template rendering engine
- Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	personalized	AI Q&A chat; leveled concept explanation (local T5 + Gemini fallback); MCQ quiz generation; text/notes summarization; personalized learning roadmap; JSON-file query/response logging; demo/mock mode; Dockerized deployment personalized learning roadmap; JSON-file query/response logging; demo/mock mode; Dockerized
Repository Link / URL		[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	User authentication; dashboard; code	authentication and role-based access; migration from JSON files to a relational database (PostgreSQL); usage analytic dashboard; consolidation of duplicate router/direct API endpoints dashboard; consolidation of duplicate router/direct API endpoints [e.g., Python, JavaScript, Java]
Framework(s) Used		[e.g., Flask, React, Spring Boot]
Key Features Implemented	1) pip install -r requirements.txt 2) Copy .env.example to .env and set GEMINI_API_KEY 2) Copy .env.example to .env and set GEMINI_API_KEY 3) uvicorn main:app --reload -> Open http://127.0.0.1:8000	
Pending / Incomplete Features		
Setup / Run Instructions		

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	
2	Meaningful variable and function names are used	
3	Code includes comments / documentation where necessary	
4	Error handling is implemented for critical operations	
5	The application runs without critical errors	
6	Code is committed to a version control repository
